"Performance without Fail – Service without compromise"

What will happen with Upgrade?

This Upgrade Document provide you the guidance on How to Upgrade SIPSNITYA Desktop Edition (Windows) to the latest version. After Upgrade you will be obtaining all patches and new features. Please be in touch with our support team for any information on the features and patches available.

Need not to worry, No data will be affected as well nothing will happen with your existing License, all will be intact except the SIPSNITYA Desktop Edition Upgrade with New features and patches.

What if it is a New Installation?

Installer program is designed to detect the existing Database, if it fail to detect the same, It will go for a fresh installation if we permit the new installation all your data if available will be wiped out. If it is fresh installation need not to worry. If you have any other requirements please get in touch with our Support team for the apt assistance.

STEP-BT-STEP Upgrade Process as follows

Step-1 : Right Click on SIPSNITYA ICON on Programs – Or Open Add Remove programs from Control Panel – Select SIPSNITYA Desktop Edition and Click on Uninstall.

Control Panel Home	Uninstall or change a program						
View installed updates	To uninstall a program, select it from the list a	nd then click Uninstall, Change or Repair.					
Turn Windows features on or off	Organise 👻 Uninstall					8==	- (

We are not provided a software rather a service which doesn't exist without your satisfaction, hence if we won't implement and deliver a world class service which always improve like any other IT/ Mobile service, we won't exist, we know it better and aligned all the necessary teams and services for the same.

Our Private Servers with SSD Storage are hosted in Technopark Trivandrum and DR in New Delhi – We rely on a corporate communication provider based out of Coimbatore for SMS & VOICE with a Backup setup in Hyderabad. All the backend services are secured with necessary service agreements to ensure our data is not available in any manner outside. We use the necessary encryptions and access security methods to ensure the maximum security for our hosted data.
