School Bus Tracking with SIPSNITYA

Real -Time GPS Tracking | Quick SMS Notifications | Many More...

GPS Integration with School Bus is not a New Topic - Its already exist very much in Market – But a seamless integration with a powerful Educational ERP used to be a challenge many times. Internet and smartphones are became very common and users are developed with their skills to manage such devices more efficiently. Fear to technology & its resistive adoption is becoming History, Our people are improved a lot.

SIPSNITYA is evolved with its transportation module with an aim to extract the best from what is already available with, More convenience, real-time updates with no additional investments. With SIPSNITYA conveyers are becoming more efficient – timely communicators, options to address the need of non-smartphone users as well

V2 - Making it Possible

Key Highlights

- ✓ Real Time GPS Tracking by using the available Mobile devices.
- ✓ It's not Mandate to have a separate Mobile APP – Installation (Device independent Browser based WEB APP. Accurate when it used with GPS Enabled Mobile Devices)
- ✓ Exclusive Conveyor Android APP – for the convenience and better accuracy.
- ✓ Quick SMS Alerts. Reach all parents of the particular Route / Bus over a single click
- ✓ Easy Monitoring – user defined Location reporting - Will monitor only Active Trips, and the trips can be changed any time.
- ✓ No Restriction – Any Conveyor can be allocated with any route or any bus. Monitoring the trip than the bus. It breaks all the current challenges (In traditional system – device is installed with Bus and parents have updates about Bus Location, if in case another Bus used then configuration changes are required)
- ✓ Part of SIPS NITYA – Not separate Application / Module – Hence no worries about ERP integration.
